## INTERNSHIP EXPERIENCE

### EXCELR Solutions,2023-2024 Projects

#### Healthcare Analysis

- The Healthcare Analyst Project involves analyzing data related to the total performance score, health care providers, identifying areas of improvement, benchmark against industry standards, and promoting quality care delivery across different chains.
- Analyzed key performance indicators (KPIs).
- Created dashboards and reports to communicate findings to stakeholders. Use visualization tools like Tableau, Power BI, or similar platforms for effective data presentation.
- Provide strategic recommendations based on analysis to improve healthcare analysis.

### TATA STIVE Aug 2024 – Nov 2024

Conducted Vulnerability assessment of web applications using OWASP ZAP and burp suite, identifying and reporting over critical vulnerabilities, including SQL injection and cross-site scripting (XSS). Assisted in incident response activities by analyzing network traffic with Wireshark and TCP-Dump to identify the source and scope of security incidents.

- SQUID PROXY: Implemented and configured Squid Proxy server to enhance network performance and security by managing traffic and access control. Optimized caching mechanisms to reduce bandwidth usage and improve response times for end-users
- WEB APPLICATION VULNERABILITY ANALYSIS: Performed security assessment on a sample e-commerce application using burp suite and identified OWASP Top 10 vulnerabilities (e.g., SQL Injection, XSS).
- NETWORK SECURITY MONITORING: Set up a simulated network environment to detect and migrate MITM attacks using Wireshark and Ettercap. Monitored network traffic, identified suspicious patterns, and implemented defensive measures.
